

COUNCIL PROCEEDINGS.

A stated meeting of Council was held at the Council Chamber last Monday evening.

Present, J. Wesley Wright, Burgess; Joshua Burton, Nelson Green, A. Hoeding, A. K. Joyce, Clarence N. Peirce, Wm. Tabram, Jacob M. Winder and James Wright.

The Street committee reported, in regard to the telephone pole on Mill street objected to by Mrs. Brodnax, that they failed to see that in any way damaged the property and could not see any place where it could be located that would be less objectionable.

The Fire committee reported "progress" on matters referred to its consideration.

The following bills were presented, read and passed:

William F. Bailey, repairing street lamps.....\$11.25

Frank N. Booz, lamp post.....11.00

Perkins Globe Light Co., lighting and care of lamps 3 months.....40.00

Wm. Stines, lighting and care of lamps, 1st ward.....9.37

3rd ward.....9.37

Garrett Printing Co., printing an advertising card.....12.25

Valentine Gervan, work on streets.....5.00

Henry Rue, work on streets.....5.00

Thomas C. Gouline, repairing curbs.....3.42

John S. Peirce, work on streets.....3.42

S. S. Rue & Son, burial of poor.....18.00

Charles Saxton, Constable's salary 1 month.....50.00

Total.....\$200.22

On motion of Clarence N. Peirce the Ordinance committee were directed to prepare an ordinance prohibiting the storage of more than one barrel of illuminating oil without a license being first obtained.

Clarence N. Peirce offered the following: Resolved, That the Burgess direct the High Constable to summon a posse and arrest all vagrants found building fires within the borough limits. The resolution was adopted.

On motion of A. K. Joyce, Fire Co. No. 1, was instructed to ascertain the cost from the Telephone Company of connecting the engine house with Joshua Burton's residence.

On motion of James Wright the Clerk was instructed to send copies of the Charter and Borough Ordinances at 50 cents each.

On motion of Clarence N. Peirce a copy of the Charter and Borough Ordinances was presented to the Justices of the Peace of Bristol Borough.

A communication from Charles B. Johns, Sr., and D. Wesley Johns claiming damages from the borough to the amount of \$2,500 for water inundating their premises, was on motion of A. K. Joyce laid on the table.

Council then adjourned.

—The first public installation of Martha Washington Chamber No. 2, order of Knights of Friendship, took place on last Thursday evening in the presence of a large number of invited guests. The Grand Lodge officers arrived from Philadelphia, shortly after eight o'clock, and installed in their respective chairs the officers elected at the preceding meeting, after which an hour's time was taken up in speeches by the Grand Lodge officers and several of the members, exemplifying the work of the order and the advantages gained by association. Recitations, and other entertainments were indulged in. As a result of the public installation we understand that fifteen applications for membership will be made at the meeting this evening.

—About eight o'clock on Tuesday evening last the watchman at the Clark Electric Wire Company telephoned to the exchange that the rubber mill was on fire. The alarm was responded to by both fire companies, but on account of the inability to obtain water of but little service. The fire apparatus belonging to the mill was however brought into instant use and effective service rendered. The building on fire was the oil boiling building, and was located about twenty feet away from the other buildings. The damage was about \$500, but would have been greater had not the building been nearly fire proof. The origin is supposed to have been caused by the fires under the kettles not being sufficiently banked.

—In accordance with a resolution adopted at council on Monday night, the Constable summoned a posse of citizens on Tuesday evening and made a raid on a gang of tramps who were infesting the borough, in the neighborhood of Otter creek. A number were captured and their cases were heard before Esq. Bailey. Four of them were sent to Doylestown. It is said that ladies have been stopped after nightfall by these Knights of the Road and money demanded; and a number of instances are reported where they do to dwellings and demand, in various threatening tone, something to eat. It is to be hoped that these thieving pedestrians will be completely routed from this neighborhood.

MARY ANN.—A "patent outside," paper can hardly be called a newspaper. It is purchased by persons who control a printing office, printed on one side, and is obtained at a very small advance beyond the price paid for blank paper. The printers of papers in this section of Pennsylvania which use the "patent outside" get their ready print paper in Philadelphia or New York. The printer of the inside pages has no control over the matter on the outside of the sheets and sometimes some very ludicrous mistakes occur. No newspaper of any standing uses the "patent outside" arrangement.

—The trustees of Lafayette College have elected the Rev. Dr. J. H. M. Knox, of Bristol, Pa., president of the college, to succeed Dr. Cattell, whose resignation goes into effect within three weeks. Dr. Knox has eminent qualifications for the office. He was formerly pastor in Easton, Pa., is a trustee of the college, a gentleman of fine appearance and manner, with excellent business talent added to all the scholarship essential to success. He will be a worthy successor of a worthy man. Dr. Cattell retires with the respect and gratitude of the college and its friends, and we trust his health may be reinvigorated by his intended travels in foreign lands.—New York Observer.

NEW BOOKS.

The following books have just been received by the Bristol Library:

"David Copperfield," "Martin Chuzzlewit," "Oliver Twist," "Uncle Remond," "Great Expectations," "Christmas Stories," "Tale of Two Cities," "Little Dorrit," "Nicholas Nickleby," and "Dombey and Son," by Charles Dickens; "The Autobiography of Thurlow Wead," "The Life of James Buchanan," by G. Ticknor Curtis; "The Story of Ida," "Richard Brinsley Sheridan," by Mrs. Oliphant; "Virginia," (American Commonwealth Series) by John Esten Cooke; "From Gettysburg to the Rapidan," by General A. A. Humphreys; "Anecdotes of Home," "Home Occupations," by Janet E. Buttz-Rees; "Household Hints," by Emma Whitcomb Babcock; "Magnum Bonum," by Charlotte M. Yonge; "An Old Fashioned Girl," by Louisa M. Alcott; "We Girls," by Mrs. D. T. Whitney; "The Arundel Motto," by Mary Cecil Hay; "Kilmeny," by William Black; "Jewish Artisan Life," by Frank Delizich; "Scottish Characteristics," by Paxton Hood. Also the following numbers of the Franklin Square Library, "The New Timothy," by William B. Baker; "The Romantic Adventures of a Milkmaid," by Thomas Hardy; "What Hast Thou Done?" by J. F. Molloy; "Disarmed," by Miss Edwards; "By the Gate of the Sea," by E. O. Murray; "The Brooklyn Bridge," "Frederick the Second," and "Maria Theresa," by the Duc de Broglie; "Sir Tom," by Mrs. Oliphant; "A Foolish Virgin," by Ella Wead; "Aut Caesar aut Nihil," by the Countess M. Von Bothmer; "Donal Grant," by George Macdonald; "Pearla," by Miss Edwards; "Thicker than Water," by James Payn; "Altiora Peto," by Laurence Oliphant; "Robert Reid, Cotton Spinner," by Alice O'Hanlon; and "The Senior Songman."

—The performances by the Davenport brothers and other Spiritualists are clumsy compared with the arts of the far Northwest Indians. The conjurers are legion that will permit themselves to be bound, not merely hand and foot, but the whole body swathed with thongs, with ropes and rawhides, and afterward tied up in a net, and then release themselves almost instantly on being placed in a little "medicine lodge" of skins constructed for the purpose, the bonds being thrown out through an opening in the top, without a knot apparently disturbed. Dr. Archie Stockwell writes that he recently saw a medicine man go through with a long series of incantations, drummings, rattling of gourds, &c., for the relief of a consumptive, lying in the centre of an ordinary lodge. Suddenly he announced that he had discovered the spirit that afflicted the sufferer, and thereupon, plunging his hands beneath the single blanket with which she was covered, drew forth the carcass of a full grown wolf, and flung it with great violence against the door, greatly to the delight, mystification and satisfaction of the beholders. He now assured the friends of the speedy recovery of the squaw, but she died the same night, nevertheless.

—About the personality of Western men on New York newspapers Howard writes to the Philadelphia Press: "There is no danger of the New York press being Westernized—whatever that may mean. Mr. Pulitzer can hardly be called a Western man. He's a Bohemian man. His chief men are not Western men. Hancock, the manager, is from Philadelphia and New Orleans. Leaven, the chief writer, was on the Herald staff for years on the World, Sun and Star. No other paper has Western men. Whitelaw Reid made his reputation in Washington and on the Tribune. Western journalism suits the West. It has its peculiarities and its peculiar field, but it has no Eastern colorings. The papers of New York go everywhere."

—Officers of the Post Office Department are reported as saying that the new postal notes are "proving a great convenience to lottery companies and to the many firms and corporations throughout the country which have been black-listed by the Department and denied the privilege of the money order and registry systems." Thirteen of such concerns are now having remittances made to them in postal notes, which are payable to bearer, and which do not come within the scope of the Department's order forbidding the payment of money orders.

—A Baltimorean who has just returned from New South Wales says that some of the "sheep stations" there have from 100,000 to 300,000 acres, and as many as 250,000 sheep. On Alfred Hay's farm 2,000 sheep were shorn before breakfast by about seventy-five shearers. Kangaroos are numerous and troublesome. They ruin the sheep pastures, and the Government has been constrained to offer a bounty of 75 cents a head for their scalps. Hundreds of thousands are killed annually.

—W. D. Howells does not believe in taking vacations after hard work. He "falls to see that long terms of intellectual inactivity are beneficial." On the contrary, he thinks them injurious. There is a reluctance about turning to work again. Rather than take a long vacation he apportions his work so that it never becomes irksome.

—The bones of Guitierrez have been removed from the Army Medical Museum to the Surgeon General's office, where their identity is concealed except from a few officials. The reason is that the curiosity hunters took up so much of the time of the officials of the Medical Museum as to interfere with their work.

—List of letters remaining in the Bristol post office, Wednesday evening, October 10th, 1883.—Mrs. J. B. Arundel, George Appleson, Andrew Bami, Mary Birch, Samuel C. Butler, Mrs. Anna G. Cor, Patrick Caneel, W. D. Craig, Rosanna Clark, Edward Dier, William M. Dier, Dennis McCreedy, J. O. E. McKee, Mrs. C. J. Stank, P. F. Whelan, Mrs. W. Whelan, Mrs. William Whelan, Postmaster, Charles Banorick, Anne Barlow, James Barlow, Daniel McGee, James McKinley, Catherine O'Brien, Septimus Tucker.

THE BALLROOM.

—The ballroom in some parts of the South and West is becoming as dangerous a place of resort as the salubrious. On Saturday night alone three murders were committed at dance parties in as many different places—one in Kentucky, one in Indiana, and one in Georgia. Moralists who are accustomed to decry the deadly dance might gather some recent statistics to show its deadliness in a literal as well as metaphorical sense.—N. Y. Sun.

—WHAT WILL STOP MY COUGHING AT NIGHT? Guarantee Acker's English Remedy will. Price 25c. Sold at J. K. Young, Druggist, 55 Bath street, Bristol, Pa.

—There has been only one rainfall in Yazoo county, Mississippi, since last spring. All the cisterns are dried up, and water has to be obtained from the river.

—A THOROUGH COURAGE OF Acker's Blood Purifier will remove all taint from the blood. It cures all kinds of skin diseases, such as Eczema, Pimples, Ringworm, Itch, Scabies, etc. Sold at J. K. Young, Druggist, 55 Bath street, Bristol, Pa.

—It is estimated that the new buildings to be erected in Knoxville, Tenn., in the coming twelve-month will cost \$1,000,000. Northern capitalists are to build a \$100,000 hotel there.

—NO LONGER A QUESTION of opinion, we guarantee every box of Acker's Dyspepsia Tablets. Price 25c. Sold at J. K. Young, Druggist, 55 Bath street, Bristol, Pa.

—The Post Office says that the new postal notes, being payable to bearer, enable lottery companies and black-listed corporations to defy the denial to them of the privileges of the money order department.

—AN OLD NERVE SAYS: Acker's English Remedy is best for coughs, croup, diphtheria, or bronchitis. Sold by John K. Young, Druggist, 55 Bath street, Bristol, Pa.

—The old A. M. E. Church on Pond street has been purchased by George Glenn and will be used as a leather dressing and dyeing establishment.

—USE ACKER'S ENGLISH REMEDY FOR COUGHS, CROUP, DIPHTHERIA, OR BRONCHITIS. Sold by John K. Young, Druggist, 55 Bath street, Bristol, Pa.

—The immense crematory at Rome is in almost daily use. Cremation is daily becoming more popular, and bids fair soon to dispose of more corpses in the Italian capital than old-fashioned burial.

—LADIES SHOULD REMEMBER, a beautiful complexion results from using Acker's Dyspepsia Tablets. Sold by John K. Young, Druggist, 55 Bath street, Bristol, Pa.

—Virginians are beginning to turn the peanut into flour, and say it makes a peculiarly palatable "biscuit."

—"I DON'T FEEL WELL." The stomach is out of order; neglected, this means chronic dyspepsia. You should take Acker's Dyspepsia Tablets and avoid this terrible disease. Sold by John K. Young, Druggist, 55 Bath street, Bristol, Pa.

—The people of the Island of Guernsey had the pleasure this summer of perceiving a flag floating above the prison. It indicated that not a prisoner was within. The population of the island is about 35,000.

—A BRONZE DOORSTEP, inscribed with the name Nebuchadnezzar, has been placed in the British Museum. It was taken from the great temple of B-Saggit, at Borsippa, and, as it records the king's restoration to health, was perhaps a votive offering.

—Pork and sausage at the Union Meat Market, corner of Wood and Mill streets. George L. Horn, proprietor.

—John DuBois, of DuBois, Clearfield county, this state, is said to be worth \$14,000,000.

—Five lines are enough to inform the public that at Charles H. Fenton's grocery, corner of Mill and Cedar streets, first class groceries are sold at the lowest market prices.

—Rich, rare and juicy are the famous steaks of Edward S. Stackhouse. There is no disappointment in his announcements. For juicy steaks and choice roasts, for lamb chops and legs of mutton, try his meat market and you will be well satisfied.

—D. S. M. M. These initials stand for Dorrance Street Meat Market. It was once supposed, in view of the fact that that is the place to buy good meat at reasonable rates, that it meant Daily Save Much Money by going to this popular stand, but Mr. Correll assures us that the first explanation above is the correct one, although the second is also strictly true.

MARRIED.

GILES-WILSON.—At the residence of Joseph H. Foster, in Bristol, October 10th, 1883, by Rev. Wm. C. Roberts, Minister of the Gospel, Mr. John H. Giles, of Springfield, Mass., to Mrs. Lizzie M. Wilson, of Bristol, Pa.

PHILLIPS-VAN DUSEN.—On October 10, 1883, at the Madison Avenue Baptist Church, by the Rev. C. W. H. Brimmon, D. D., Edward S. Phillips and Nellie Lockman, daughter of Mr. Samuel B. Van Dusen, all of New York.

DIED.

WOOLSTON.—At Langhorne, October 6th, 1883, Rhina Woolston, in the 67th year of her age.

NEW ADVERTISEMENTS.

65 REWARD.

LOST ON SATURDAY, SEPTEMBER 23rd, 1883, between Wood and Walnut and Penn and Cedar streets, a gentleman's GOLD SOLE LEATHER SHOES, with one Stone setting. The above reward will be paid if left at the GAZETTE office.

TEXAS HORSE SALE AT MORRISVILLE.

Will be sold at public sale, at Frazer's hotel, in Morrisville, on Wednesday, OCTOBER 17th, 1883, at 10 o'clock, A. M., the following horses, viz: SEVEN HEAD OF HORSES, twenty-seven years old to 4 years old; six young horses, some of them well broken, and some of them are large ones, suitable for farming or driving. Come to the sale at 10 o'clock, and see the horses without reserve. A credit will be given.

H. D. STACKHOUSE, E. P. WIGGART, Auctioneer.

\$300,000

Ordinary stock, in shares of \$50 each, in The London and Westminster Investment Company, organized to conduct a very profitable investment business in the United States and Canada, is offered for subscription at \$1 in amounts to suit investors. The next issue will be made at a considerable premium. Shareholders at all times of collection, may pay in full at once or by installments. Address, at once, for full particulars, the Managing Director, EDWARD LEBLEY, London, Canada.

WANTED.—Fruit trees, grape vines, shrubs, etc., for sale. Apply to J. K. Young, Druggist, 55 Bath street, Bristol, Pa.

For Sale.

Hours of every day and description. Terms of payment liberal. J. H. HOGUE, Druggist and Chemist.

From the Editor of the Buffalo News
BABY'S LETTER.
BY L. J. B. B. B.
Here is a letter from a baby to his mother, written in the language of a child. It is a very touching and beautiful letter, and is worth reading to every mother and father. It is a letter from a baby to his mother, written in the language of a child. It is a very touching and beautiful letter, and is worth reading to every mother and father.

SCIENTIFIC MISCELLANY.
After tracing the invention of the telephone to Philip Reiss, whose instrument was exhibited to the Physical Society of Frankfurt in 1861, scientific authorities are still not content to let the matter rest. The late claimant put forth is a Frenchman named Charles Bourselet, who is said to have originated the telephone in 1854, and to have communicated the invention to the French Academy in the same year.

The speed of gaseous explosions is being investigated by Messrs. Berthelot. When carbonic oxide and oxygen were exploded in a tube by a spark, their rate of explosion was found to be more than 8,000 feet per second, which is a far greater speed than the investigator expected would be registered.

Dr. J. Murray-Gibbes, of New Zealand, declares that *Endoglyphis globulus*, the blue gum tree, "contains properties which are perfectly antagonistic to the germs of diphtheria," and that he has used the plant in his practice with such remarkable success that he feels justified in pronouncing it a cure for that disease. His treatment includes the keeping of the patient away from the slightest draught of cold air, in a warm room in which the atmosphere is impregnated constantly with steam from a boiling infusion of the blue gum leaves.

In 1878 a remarkable discovery of bones of the fossil ruminants known as *Iguanodon* was made in a coal mine of Belgium. Three years ago, in removing the remains, which are supposed to belong to 23 skeletons. One of the skeletons is now mounted in the animal's semi-erect position, and extends over a horizontal floor space over 23 feet in length.

The state of the ice in the Arctic seas varies greatly in different years, and it has unfortunately happened, Mr. Karl Petersen of the Tromsø Museum remarks, that most of the important expeditions sent to the polar regions have encountered adverse seasons. This author suggests that a systematic scheme of exploration should be adopted by which advantage might be taken of favorable seasons. It may be presumed that the changes in the condition of the ice take place periodically, and must run their cycle in ten or eleven years. He would therefore have steamers dispatched yearly to the several points from which the pole is most likely to be reached—these points being, in his opinion, the north of Spitzbergen, the northeast of Novaya Zemlya, and the Behring Straits. These expeditions should be continued for eleven years, attempts to approach the pole being made when the water channels might appear sufficiently free from ice. For several years the Dutch have sent an annual expedition to Novaya Zemlya and Spitzbergen, but their failure to gain important geographical results has probably been largely due to the fact that sailing vessels have been used instead of steamers.

The antiquity of magnifying glasses is indicated by the following passage from the writings of Confucius: "The great Chinese philosopher, who died 478 years B. C. 'As we use the glass to examine the faces of things, so must we study antiquity to understand the present.'"

A new vegetable parasite, *Haplocoecus reusculatus*, has been discovered in pork by Dr. Zopf. It was found in from thirty or forty per cent. of the entire number of animals examined.

Prof. Lockyer, the English astronomer, thinks it very probable that human life on the planet Mars is very much like that on the earth. The light must be less brilliant, but the organs of sight may be so much more susceptible as to make the vision quite as good. The heat is probably not so great, but it is by no means less in proportion to the lessened power of the sun's rays. This observer agrees with others in affirming that several remarkable seas—including inland seas, still larger seas, and some not so connected—are now definable in the southern hemisphere, in which, as is the case with the earth, the water area seems to be much greater than the northern hemisphere.

A Norwegian plant-geographer, Prof. Schubert, called attention a short time ago to the remarkable fact that most plants in high latitudes produce much larger and heavier seeds than in warmer regions nearer the equator—an effect which he ascribes to prolonged influence of sunlight during the long summer days of the high latitude. In some cases the difference of seed-development is most astonishing. Dwarf beans taken from Christiansburg to Drontheim—less than four degrees farther north—gained more than sixty per cent. in weight, and thyme from Lyons when planted at Drontheim showed a gain of seventy-one per cent. The grain of northern fields is heavier than when grown in more southern localities; and seed from Norway planted at Breslau decreased greatly in the first year. The leaves also of most plants are larger and more deeply colored in high latitudes as was first noticed by flowers, and many which are white in southern climate become violet in the far north.

A DETECTIVE'S EXPERIENCE.
His Successful Undertaking and Escape from the Suspicious Police.
(By J. H. B. B. B.)
One morning several years ago, just as the dull gray light was beginning to show itself in the east, a small band of men might have been seen deployed about a house on Ferry street, in Buffalo. There was nothing special either in the dress or appearance of the men, or in the nature of their intention, but it was plain that they had business of importance on hand. Suddenly a man appeared at one of the windows, took in the situation at a glance, and, swinging himself outward with a wonderful quickness, scaled the roof of the house. This man was Tom Ballard, the notorious co-interpreter, and armed, he defied his pursuers, and the officers below him. Some of the officers, knowing the desperate character of the man, proposed to shoot him until he was killed, but one of the number promptly protested, and declared that if his brother officers would assist him to ascend he would capture the man alive. Accordingly he began the difficult and dangerous task, and succeeded in bringing his prisoner to the ground in safety.

The man who accomplished this task was Mr. Thomas Ballard, the present superintendent of city police of Buffalo, N. Y. Mr. Ballard is a man known by every prominent detective and policeman in America, and stands pre-eminently in the front rank of his profession. Quiet and gentle in appearance and manners, he possesses a courage, combined with an unflinching physical power, that make him the terror of evil doers and the pride of law-abiding citizens. Two people can realize, however, the trials, exposures, and even privations, to which the members of every municipal police and fire department are exposed. Compelled to be a duty in uncertain hours, subjected to the most inclement weather, and often necessitated by the nature of their duties to perform undutiful tasks, they endure a nervous and physical strain that is terrible. It is the experience of Mr. Ballard in former days, and it is not surprising that he found himself suffering from a mysterious physical trouble. In relating his experience to a representative of this paper he said:

"At the time when I was on duty I would feel an unaccountable weakness and lack of energy. My appetite was also impaired, and I did not understand the reason for it, but supposed, as most people suppose, that I was suffering from malaria. I tried to throw off the feeling, but it would not go. I thought I might overcome it, but I found I was mistaken, and I finally became so badly off that it was almost impossible to attend to my duties. I have known many number of men in the police and fire departments of this country who have been afflicted with this trouble, and I doubt not there are to-day hundreds similarly troubled, who, like myself, did not know the cause, or really what ailed them."

"Your present appearance, Mr. Ballard, does not indicate much physical debility," said the interviewer as he looked at the 220 pounds of bone and muscle standing newly from the floor eleven inches in height before him.

"O, no, that is altogether a thing of the past, and I am happy to say that for more than a year I have enjoyed almost perfect health, although I now realize that I was on the road to certain death by Bright's disease of the kidneys and travelling at a rapid pace."

"How did you come to recover so completely?"

"That is just what I want to tell you, for I believe it may be of great service to many others in my profession, who may possibly have it. I began the use of a popular remedy at the earnest solicitation of a number of friends in this city, and found to my great gratification that I began feeling better. This feeling continued, and I gained in strength and vigor until now I am perfectly well, and wholly without the instrumentality of Warner's Safe Cure which I believe to be the best medicine for policemen, firemen, railroad men or any other class of men exposed to danger of change of weather, ever discovered. Since my recovery I have recommended it everywhere, and never knew a case where it failed to cure or benefit. I would not be without it under any circumstances, and I am positive it is a wonderfully valuable remedy at the same time entirely harmless."

"Indeed, I see that Dr. Gunn, dean of the United States Medical College, of New York, endorses it in the highest terms."

"So you experience little difficulty in the execution of your duties now, Mr. Ballard, do you?"

"No, whatever. Our department was never in better condition than at present."

How to Loosen a Tight Screw.
The *Booker* says: "One of the most simple and readiest methods of loosening a rusted screw is to apply heat to the head of the screw. A small bar or rod of iron, flat at the end, if reddened in the fire and applied for a couple or three minutes to the head of the rusty screw, will, as soon as it heats the screw, render its withdrawal as easy by the screw driver as if it was only a recently inserted screw. As there is a kitchen poker in every house, that instrument, if heated at its extremity and applied for a few minutes to the head of the screw of screws, will do the work of loosening, and an ordinary screw driver will do the rest, without causing the least damage, trouble or vexation of spirit. In all work where the common kind, where it is necessary to use screws, and particularly in large work and machinery, fastenings and appliances affixed to machinery or furniture where we would advise the oiling of screws or the dipping their points in grease before driving them. This will render them more easy to drive and also to withdraw, and it will undoubtedly retard for a longer time the action of rusting."

Rheumatic Syrup Cure.
Gentlemen—I wish to acknowledge the great benefit I received from the use of your Rheumatic Syrup. I was sick for some time, and under the doctor's care, with what he called the liver complaint and rheumatism in my back and shoulders. Could find nothing to relieve me until I commenced taking your Rheumatic Syrup. After taking one bottle I could feel a decided improvement. I continued its use a short time and it cured me. I most cheerfully recommend it to any afflicted in like manner.

ALCOCK'S POROUS PLASTER.
Cure where other Plasters fail even to relieve. Take no other or you will be disappointed. Insist on having ALCOCK'S.

PHILADELPHIA, 808 NORTH THIRD ST., February 1, 1882.
I have been using ALCOCK'S POROUS PLASTER for a number of years and always with marked benefit. I have been much troubled with Muscular Rheumatism; have been treated by five of our best physicians without receiving any relief whatever. I then saw a Pittsburgh paper the statement that physician Charles Alcock, of the Army, possessed the first five-dollar note issued by the United States. He has written to Mr. Candee offering to prove property, and hopes to recover the treasure, for which, it is said, the present possessor has declined an offer of \$300.

WARREN'S CURE.
COOPER, N. H., March 8, 1883.
I have been greatly troubled with Rheumatism and Weak Kidneys. I was advised to try ALCOCK'S POROUS PLASTER (had used two other kinds of no good), but one of your letters worked like a charm, giving me complete relief, and I am now free from all trouble. I can assure you the pain has entirely left me. I can recommend them to every one as the best plaster made. I have tried other kinds but found them worthless.

WARREN'S CURE.
COOPER, N. H., March 8, 1883.
I have been greatly troubled with Rheumatism and Weak Kidneys. I was advised to try ALCOCK'S POROUS PLASTER (had used two other kinds of no good), but one of your letters worked like a charm, giving me complete relief, and I am now free from all trouble. I can assure you the pain has entirely left me. I can recommend them to every one as the best plaster made. I have tried other kinds but found them worthless.

WARREN'S CURE.
